OptionWerx.com

Analysis Objective

Our A.I. algorithms gather and analyze large sets (47,000+) of option chains, analyzing and ranking the most profitable OTM options based on various compounded and weighted indicators such as stock and option price trends, volume trends, moving averages, etc...

Analysis Result Categories

Results are categorized by A.I. Ranking, Days to Expiration, and Stock Price Group. These categories are 'statistically exclusionary' (certain Rankings and Stock Price Groups may not appear if criteria are not met).

- A.I. Ranking - 2 groups of option chains based on overall compounded statistical significance.
 - Best - top 18%
 - Better - mid 27%

Days to Expiration - only includes options that expire between 2 to 30 days

Stock Price Groups - results are ranked in the following groups

- \$0 to \$15
- \$15 to \$35
- \$35 to \$75
- \$75 to \$200
- \$200+

Our Strategy

We utilize this intelligence to SELL Covered CALLS. We look for short-term, consistent returns, greater than 5%. Our objective is to SELL Covered Calls which will be 'called away' within the 2 to 30 day time period hence locking in the option premium return as well as the strike price differential. If the stock is not 'called away', we continue to SELL additional Calls collecting additional premiums.

These analytics contain timely information and is time stamped accordingly. If our orders don't fill within 3 hours, we cancel our outstanding orders and wait for the next analysis.
